Dear Mnatsakan,

Please check the datasheet in the attachment, and don't worry, we will produce this laser completely according to the customer's requirements. And I will send you test report before shipment, if you confirm the test report is ok, I will arrange the shipment.

Best regards,

If you need further assistance, please don't hesitate to contact me.

主题: Re: Re: Re:Re: Re: Re:Re: Re: Re: Fw: Single-mode, single-frequency lasers and diode

Dear Demi Zhang,

My customers looked at your site. The MSL-U-532-1w series lasers that you offer us have a coherence of >50m. And you sent me coherence characteristics >100m.

We require coherence >100m. This is a very important parameter. When purchasing, all parameters will be checked, if at least one parameter that I indicated when communicating with you does not match, we will have big problems. Please, I beg you, if anything does not match, please let me know in advance.

Dear Mnatsakan,

Just for record. the Fan under the laser head with an extra adaptery, If the application is holography, please don't connect the adapter, the Fan vibration may affect the effect of the experiment.

Ok, I will send you a video when we test the coherent length.
